PROFESSIONAL SUMMARY

Software Engineer and AI Systems Engineer with 4+ years of experience building production web applications and intelligent systems. Founder of Devalyze, winner of first place at Selfless Heart TechCon '25, and a software and machine-learning contributor to AIMHER Health, an AI-powered women's health platform for PCOS detection. Builds across React, TypeScript, Node.js, PostgreSQL, and Redis, and develops AI workflows with Python, XGBoost, ONNX Runtime, and scikit-learn. Brings product ownership, systems thinking, and technical leadership to software for health, finance, education, and operations.

WORK EXPERIENCE

AI Engineer (Internship) @ Opex Consulting
Aug 2026 - Present

- Contributing to AI engineering initiatives and intelligent software development at Opex Consulting.

Focus: AI engineering, machine learning

Development Team Lead (Founder) @ Devalyze
Aug 2025 - Present

- Founded and led development of a SaaS link management platform, designing scalable backend services and responsive frontend architecture
- Led cross-functional team to 1st place at Selfless Heart TechCon '25, recognized for product innovation and real-world impact
- Architected RESTful APIs and optimized database performance for real-time link generation

Stack: *React.js, Node.js, Express.js, MongoDB*

Full-Stack Developer (Internship) @ Opex Consulting
Aug 2025 - Present

- Built FinanceDaily, a financial intelligence platform delivering automated market insights via email to subscribers
- Developed OpexCal, a unified productivity SaaS integrating tasks, meetings, and milestones with real-time organizational tracking
- Designed backend workflows for scheduled content distribution using Nodemailer
- Collaborated with product and design teams to improve UX and overall engagement metrics

Stack: *React.js, Node.js, Express.js, MongoDB, Tailwind CSS*

Frontend Developer @ ATC Africa
Feb 2025 - Present (Part-time)

- Developed scalable UI components for the TXA'26 platform used across multiple African digital initiatives
- Built and shipped sheInnovate platform, contributing to digital empowerment initiatives for women in tech across Africa
- Improved frontend performance and responsiveness across devices for a diverse user base

Stack: *React.js, Tailwind CSS*

Frontend Web Developer (Contract) @ Phoenix Technologies
Nov 2024 - Nov 2025

- Built accessible, responsive interfaces for EdTech platforms focused on data science education
- Developed and maintained MyPDM Tutor, an interactive learning platform for technical education delivery
- Improved usability and content delivery for technical learning systems

Stack: *React.js, JavaScript, HTML, CSS*

PROJECTS

AIMHER Health | *AI Digital Health*

- An AI-powered women's health platform supporting PCOS detection, presented at the NextGen Innovation Challenge 2026 in London, UK.
- Built an end-to-end PCOS detection workflow using XGBoost and ONNX Runtime, with backend services for model serving and prediction APIs.
- Roles: Assistant AI Researcher, Lead Developer, and Machine Learning Engineer. Team: Opakunle Kingsley and Shefiq Owade.

Stack: *Python, XGBoost, ONNX Runtime, React, Express.js*

Tender Intelligence | *AI Systems / RegTech*

- Developing a tender-monitoring system that gathers opportunities and documents for structured review.
- Building AI-assisted assessment workflows to help teams evaluate opportunities and decide what to pursue.

Stack: Python, FastAPI, SQLAlchemy, Alembic

Payforms | *FinTech / EdTech Platform*

- Built an institutional payment platform for schools and universities featuring a no-code form builder and automated reconciliations
- Integrated Paystack for secure payment processing with real-time analytics and a full email verification workflow
- Designed multi-tenant backend with RBAC meeting international banking and educational compliance standards
- Implemented Redis caching for high-performance data retrieval across concurrent institutional users

Stack: *React, TypeScript, Tailwind CSS, NestJS, PostgreSQL, TypeORM, Paystack, Redis*

PTLPOS | *POS / Retail SaaS*

- Built an all-in-one point of sale, inventory, and analytics platform for modern multi-branch retail operations
- Developed lightning-fast touch-optimized checkout with real-time stock tracking across unlimited branches and powerful sales analytics
- Architected multi-tenant SaaS backend with RBAC, inventory ledger, production tracking for recipes/raw materials, and Redis-backed caching
- Implemented customer management with full purchase history and branch-level reporting dashboards

Stack: *Next.js, TypeScript, Tailwind CSS, NestJS, Prisma, PostgreSQL, Redis*

A-Mentra | *EdTech / Workforce Platform*

- Built a digital SIWES/industrial training system now serving 500+ institutions and 10,000+ students across Nigeria
- Replaced manual logbook workflows with structured digital supervision, tracking, and reporting systems
- Designed scalable backend with real-time data handling for institutional operations at scale

Stack: *React, TypeScript, Tailwind, Express.js*

ATrackSys | *Academic Operations System*

- Developed a real-time attendance management system with role-based access control for academic environments
- Integrated Supabase for authentication, live data sync, and real-time state management

Stack: *React.js, Supabase*

Wyvadot PR | *Public Relations Platform*

- Built a digital PR and communications platform to streamline press releases and stakeholder engagement
- Designed a clean, responsive interface optimized for content publishing workflows

Stack: *React.js, Node.js, Tailwind CSS*

HACKATHONS & COMMUNITY INITIATIVES

Selfless Heart TechCon '25 | 1st Place Winner
Led team to build Devalyze, winning first place for innovation, technical execution, and real-world developer impact.

Cyber Cathedral '26/27 | Mentorship & Training Lead
Leads mentorship and training initiatives at Cyber Cathedral.

GDG-Tech-U '26/27 | Technical Lead
Serves as Technical Lead at GDG-Tech-U, supporting its developer community and technical programmes.

CampusVerse | Technical Lead
Drives technical strategy and engineering decisions, mentoring developers and coordinating cross-functional product delivery.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, HTML5, CSS3
Frameworks	React, Next.js, Node.js, Express.js, Tailwind CSS, TensorFlow, XGBoost, scikit-learn

Databases	PostgreSQL (Neon), MongoDB, Redis, TimescaleDB
Tools	Docker, Git, GitHub, Prisma, Supabase, Azure, Vercel, Render, Postman, ONNX Runtime, Cloudinary
AI Training & Data	AI Training, Model Evaluation, Data Annotation & Labeling, Dataset QA, Technical Research

EDUCATION

B.Sc. Computer Science | Abiola Ajimobi Technical University, Ibadan *Expected Graduation: 2027*
